AVONITE SURFACES

The Petals Series...

The Petals Series brings a new dimension to the Avonite Surfaces range. The unique production method used for these products gives an effect never before seen in solid surface. The twists and swirls in each pattern draw the eye into the material and are sure to enhance many design projects where a unique effect is required.

Make a bold statement...

by choosing one of these vibrant tones designed to work for you.

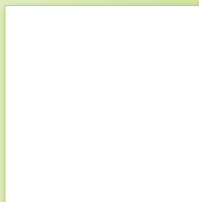

Introducing the Recycled Acrylics Collection.

You may be familiar with the recycled products in our Studio Collection of polyester décors. In another first for Avonite Surfaces, we are delighted to bring another innovation to you in the shape of four new décors in the Foundations range. Each of these four natural tones contains at least 16% recycled content saved from landfill. Caring about the environment shouldn't mean compromising on style or function - all four décors are available in 12.7mm as standard and 6mm and custom sheet sizes as a special order. Going green has never been so stylish.
